

# Restarting After Shutdown Quick Guide

Reconnecting and restarting your Nieco Broiler after temporary closure or long-term Shut Down is simple. These steps ensure that the Broiler is ready to quickly and safely return to service.

## Check

Ensure broiler was cleaned broiler according to standard Disassembly and Cleaning Procedures.

When broiler is clean, dried and reassembled, place under ventilation hood, and turn hood on.

## Connect

Connect broiler power cord.

Open the MAIN GAS VALVE.

TIP: Valve is open when it is parallel to the pipe.

## Ignite

Turn ON the MAIN POWER SWITCH on the broiler.

Follow Broiler's ignition processes to light broiler.

## Check

Allow Broiler to heat for 30-45min.

After unit has reached temperature, perform cookout to assure products meet proper cookout temperatures.

These steps ensure that the Broiler should be clean, connected properly to ventilation, power and gas, ready to resume daily service.
