[P] 1.603.225.6684

[www.ultrafryer.com](http://www.ultrafryer.com)

If you are going to shut down a fryer for an extended period of time use the following procedures:

<b>Fryer Shutdown Procedure</b>	
<b>1.</b>	Filter the fryer(s)
<b>2.</b>	After filtration, drain the oil into a suitable container, follow manufacturers recommendation for storage of oil or dispose properly
<b>3.</b>	Perform a Boil Out or Cold Soak on the fry tanks (refer to management for approved option)
<b>4.</b>	Drain and thoroughly dry the interior of the fry tanks
<b>5.</b>	Spread a thin film of clean cooking oil over the interior fry tank surfaces
<b>6.</b>	Install the tank covers
<b>7.</b>	Clean and thoroughly dry the filter pan and pickup assembly and reassemble
<b>8a.</b>	For Gas Fryers: Close the manual gas supply valve at the gas supply connection on the wall
<b>8b.</b>	For Electric Fryers: Unplug the fryer from the electrical source

<b>Fryer Start-Up Procedure</b>	
<b>1a.</b>	For Gas Fryers: Open the manual gas supply valve at the gas supply connection on the wall
<b>1b.</b>	For Electric Fryers: Plug in the fryer from the electrical source
<b>2.</b>	Remove the tank covers
<b>3.</b>	Perform a Boil Out or Cold Soak on the fry tanks (refer to management for approved option)
<b>4.</b>	Inspect all filter drawers, portable filters, crumb catches and accessories and clean thoroughly
<b>5.</b>	Reassemble the filter pan elements including new filter paper and set in place
<b>6.</b>	Fill fryers to the to about 1” below the “Oil Level” line with cold oil
<b>7.</b>	Turn fryers on for use
